

BARATHSAKI S

Software Developer

I am a motivated software development student with a passion for building innovative and efficient web applications. Proficient in HTML, CSS, and JavaScript, I have experience developing responsive and user-friendly applications. Through my academic projects and internships, I have honed my skills in problem-solving, teamwork, and effective communication. I am committed to continuous learning and eager to apply my knowledge to real-world projects, contributing to a dynamic development team.

- Tools : GIT,SELENIUM

Language

English

Tamil

Experience

○ April 2024-May 2024 CODER CAVE

Web Developer

- Completed a virtual internship focused on web development.
- Developed and maintained web applications using HTML, CSS, JavaScript.
- Gained practical experience in version control using Git and GitHub.
- Participated in code reviews and learned best practices for writing clean, maintainable code.

Projects

○ HOME HELPER APPLICATION

Technologies Used: React, CSS, HTML

- Developed a responsive web application designed to assist users in managing household tasks and chores.
- Utilized React to create a dynamic and interactive user interface, ensuring a seamless user experience.
- Implemented state management using React hooks to handle user inputs and task tracking.
- Styled the application using CSS to create a clean and user-friendly design.
- Incorporated HTML to structure the content effectively and ensure accessibility.
- Added features such as task creation, editing, deletion, and real-time updates to task lists

○ WHEATHER APPLIATION

Technologies Used: HTML, CSS, JavaScript, API

- Developed a weather application that provides real-time weather updates and forecasts for various locations.
- Utilized HTML to structure the application and present weather data effectively.
- Styled the user interface with CSS, creating a visually appealing and user-friendly design.
- Integrated a weather API to fetch and display current weather conditions, temperature, humidity, and other relevant data.

○ CHAT APPLICATION

Technologies Used: HTML, CSS, JavaScript

- Developed a real-time chat application with a strong emphasis on user-friendliness.
- Utilized HTML to create an intuitive and accessible user interface, ensuring ease of navigation and interaction.
- Designed the chat interface with CSS, incorporating modern and visually appealing elements for a pleasant user experience.
- Implemented JavaScript to enhance user interaction and responsiveness, providing seamless messaging functionality.
